1.6 Overall, I am satisfied with the class/seminar teaching by this teacher on this course.

1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- Explains concepts well and at a good pace.
- I like that he provides comprehensive answers to the questions in the homework -- it definitely helps me clarify my understanding of the paper
- The teacher has a deep understanding of the topics studied and can answer our questions on many levels, which I found extremely helpful. His slides provided to us are also very informative and the overall teaching is always interesting.
- When he goes to the whiteboard and does step by step explanations of concepts, it is engaging and helps improve my understanding.

1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Given that most students who attend class have completed the homework, I was there was more opportunity to discuss the answers rather than simply hearing what the teacher has prepared. There are definitely questions towards the end of each problem set that discuss policy implications of the paper that would be interesting to discuss.
- I think if the regression tables were annotated it would be easier to follow in class as the tables contain a large amount of information and it sometimes difficult to understand which figure in the table he is referring to.
- It would be great to receive some individual feedback on the problem sets submitted - I am yet to receive any (in December of MT). More classroom discussions would be beneficial.

1.12) 1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- I think the slides that are provided are helpful. Additionally, the basic overview of the econometric topics is helpful in better understanding the content of the course.
- Kotia is very good at explaining econometric tools intuitively and is excellent in helping us understand the core ideas of the papers we discuss in class.
- Slides are very useful
He summarizes papers very well and makes them intuitively understandable
- The slides are very well structured and go into good detail about the questions from the problem set.

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Classes could be made a bit more interactive
- He could involve more members of the class better -- sometimes I feel like the classes are like a lecture in that it's pretty one way. I understand that people don't really speak up in class so it can be a bit difficult/awkward to try to elicit responses/ideas from students, but it's worth trying and would help us feel more engaged.
- I think the teacher could engage the students more during class. The classes are very lecture heavy and I think discussion or interaction with the students will help make the class more engaging.
- Maybe prompt the class to answer questions, although this is objectively difficult with the coronavirus class set up

1.11) 1.6 Overall, I am satisfied with the class/seminar teaching by this teacher on this course.

1.12) 1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- Breaking down the content for those who haven't studied Metrics
- Kotia put a lot of time into explaining concepts that would be relevant in the exams. Given the structure of the course, Kotia adapted his seminars to ensure that we get the most information out of the course. Kotia's presentation style and explanations are concise and clear.
- Kotia was the most engaging class teacher I had this term. He was clearly passionate and knowledgeable about the material and wanted to help us understand the material as well. His powerpoints were very helpful in highlighting the most important parts of the worksheets.

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- I think communication about the homework assignments could be clearer. I heard conflicting reports about which assignments were going to be selected to be graded. The grading scheme for the homework could be also be clarified more since the point totals did not always make sense for the individual questions.
- While not entirely Kotia's fault, the class engagement was minimal. Kotia was great at asking people to participate, but he could go a bit beyond the required materials to make the classes more lively.

3.4) 2.4 I am satisfied with the amount of contact time with teachers for this course.

3.5) 2.4b Please comment below about why contact time with teachers has been less than satisfactory.

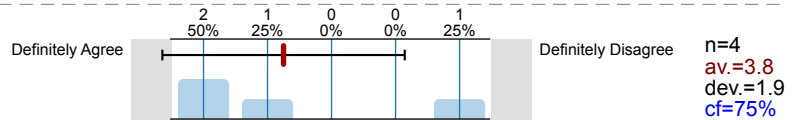

- The course material is quite dense and having more contact hours would assist in making the material easier to grasp and would allow us to engage with the material in a discussion based manner.

1.6 Overall, I am satisfied with the class/seminar teaching by this teacher on this course.

1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- Anaya is really clear, and has a very thorough understanding of the readings. He is able to simplify often complex readings into easily digestible information.
- Kotia creates problem sets that challenge me to increase my proficiency with econometrics papers in development. I think the questions are fair, although a bit vague. For instance, this question: "what are the key ingredients to the theoretical model that the author develops?" Answering this question can feel like a guessing game, but then again, his office hours is always open if I'd like to clarify, so it's not a huge deal. The papers that Kotia chooses for the class are very interesting, which I commend him for.
- The teacher has been brilliant. He has made the concepts in class easy to understand, while also linking these to broader themes in development economics and discussing what we do and do not need to know for the exam.

1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- I think he could make it more engaging with perhaps an informational video at the beginning of class, just to add some context. eg. a video about the bengali monga, or the ghana abusua.
- Nil. Good job.
- They're great, no such issues

3.26) 2.15 Would you recommend this course to other students?

3.27) 2.16 Please comment below on aspects of this course you think were particularly good.

■ Interesting readings.

■ the subject matter is brilliant, and weed by week topics relate to eachother in a fascinating way providing a narrative throughout the

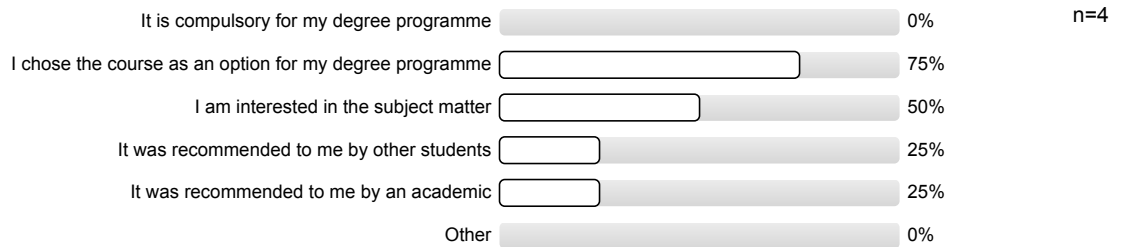

course which shows us developing towards a full understanding of development economics

3.28) 2.16b Please comment below on aspects of this course you think could be improved.

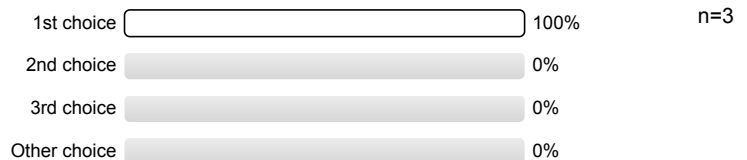

- some online Q&A forum where questions can be asked in an anonymous way
- The lectures and classes seem to be very disconnected, with separate readings for each. The topic for each week seems to be very different from the last. Learning development economics here seems to be learning bits and pieces from disparate places, hard to see how they all fit.

1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- He was able to summarise ridiculously hard econometric concepts into easy to digest, quick lessons. He involved the class, he spoke at a wonderful pace and had very clear PowerPoint. He also showed extreme mastery of the subject
- The slideshows and breakdowns of the problem sets were extremely helpful.

1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Have more time of classes, go over more content
- I would have preferred more feedback, and in a more timely fashion (I still am not able to access the feedback from before week 6). Some sort of preface to the next problem set in class would be helpful as well.
